

Interim Reporting Format

As of Q1 2024 quarterly report AutoStore has updated the format of the Q1 and Q3 interim report. The intention is to provide the financial market with a focused, somewhat less complex package of information needed to assess and model the company on a quarterly basis.

Going forward, AutoStore's disclosure will be as follows:

- Q2 and Q4
 - **No change** in interim report nor presentation compared to Q4 2023
- Q1 and Q3:
 - Quarterly presentation every quarter including Q&A with CEO Mats Hovland Vikse and CFO Paul Harrison is **unchanged**, with similar scope as before.
 - **Interim report with focused and streamlined scope and slimmer format**
 - All KPIs (order intake, backlog, revenue split by region) are included on a quarterly basis. Somewhat slimmed-down text section in the report.
 - The same measurement principles as presented in the Annual Report for 2023 are being used when preparing quarterly results. The Q1 and Q3 reports will not be IAS 34 reports per definition. The Q2 and Q4 report will have the **full scope as before** in accordance with IAS 34.
 - Financial statement in connection with Q1 and Q3:
 - **Included:** P&L
 - **Included:** Statement of financial position
 - **Included:** Statement of cash flow
 - **Included:** Alternative Performance Measures (APMs)
 - **Excluded:** Other comprehensive income/loss
 - **Excluded:** Statement of changes in equity
 - **Excluded:** Notes to the financial statements
- Annual report
 - **No changes**

We are looking forward to releasing our Q1 2024 report Thursday 25 April and to communicating with you all then. Please note that Q1 presentation will switch from a phone-based dial-in solution for analysts to submit questions to a Teams based solution. The sound quality will be much better, it provides the analysts to participate via video if they like, and it is significantly more cost-efficient than the previous solution.

Here is the link to use to log on and ask verbal questions on Teams.
