

# BRACK.CH

**Location:** Switzerland  
**Industry:** 3PL  
**Partner:** Swisslog

BRACK.CH is part of the Competec Group and is a 30 year old trading company from Switzerland. The Competec Group, which sells more than 80,000 items from 1,000 manufacturers, has been working with AutoStore for more than ten years and has installed one of the world's largest AutoStore systems to consolidate their distribution process.

The Competec Group imports and distributes an incredible variety of goods from its enormous warehouse in Willisau, near Lucerne, Switzerland. AutoStore has accompanied BRACK.CH's growth process for more than a decade and supports the company in its growth plans. The system has been expanded with two extensions from an initial 80,000 Bins to around 500,000 Bins.

An important benefit for BRACK.CH is the density of the system, which secures incredible cost savings for the company.

In addition, BRACK.CH benefits from the energy efficiency of the system and their warehouse is powered by solar cells on the roof.

“

All these incredible results make us really confident about delivering our goods in-time to our customers.
